

The image shows a corner of a room with a built-in white shelf. On the top shelf, there is a pink ceramic pot with green foliage, a black vase, and a gold vase. The middle shelf holds a similar pink pot with greenery, a stack of books including 'DECORATING with Style' by Miguel Alvarado, 'VENETIA FELIX', and 'HERE AND ELSEWHERE', and a small bottle. Below the shelves, a black wicker chair is draped with a thick, multi-colored wool blanket in shades of blue, red, and green. Two pillows, one bright green and one light pink, are on the chair. To the right, a window with white shutters is partially visible, letting in natural light. A dark glass bottle sits on the floor to the left of the chair.

We are the shutter experts who care

Thank you for your interest in ShuttersUp. We appreciate the opportunity to tell you about ourselves and why we believe we can help you create the perfect shutters to complement your home or workplace.

For us, there are two big reasons: the quality of our shutters and the depth of our customer service. Of all the UK's shutter companies, we truly believe no one cares more about helping you achieve the ideal look for your home through expertly made and fitted plantation shutters.

Care and craftsmanship have been at the heart of ShuttersUp since we installed our first shutters in 2006. Since then, we have built the company in our own image: to give every customer the best of our expertise and take pride in a job brilliantly done.

Today, we're one of the leading shutter companies with a hard-earned reputation for craftsmanship, attention to detail and customer care.

We'd love for you to experience the benefits for yourself. If you like what you see in this brochure, please don't hesitate to call us for an informal chat about your project.

Ashley Weight & Ross Evans
Co-founders & Directors

Our philosophy

Your home. Your style. Your shutters.

We always say that we don't make shutters for windows. We make shutters for people.

Our philosophy is that there is the perfect shutter for every project—a combination of the room, the purpose, your personal tastes and your budget.

Our job is to help you find the shutters that are **made for you.**

Why choose shutters?

Aesthetically, practically and economically, shutters are simply a smarter choice than blinds or curtains. Here are 6 big reasons why it's time to open up to shutters.

01

YEAR-ROUND BENEFITS

In the summer months, shutters keep rooms cool, shaded and ventilated. Then as the cold dark nights draw in, they create a uniquely warm and cosy atmosphere in your home.

02

SAVE ON YOUR ENERGY BILLS

Closed shutters give your windows the best heat insulation money can buy. One study found that wooden shutters **reduce** heat loss from windows by up to 61%, compared to just 14% for curtains.

03

NO SPACE LEFT UNCOVERED

Our shutters can fit just about any window, door or gap you can think of. We even custom-make shutters for unusual window shapes, from circles to triangles to arches.

04

INVEST IN A HEALTHY HOME

Window shutters are the allergy sufferer's friend. Where curtains and blinds harbour hard-to-clean dust and allergens, shutters are wipe-clean and hygienic.

05

CONTROL LIGHT AND NOISE

Shutters don't just put you in charge of how light your room is. They also act as a natural noise barrier in street-facing rooms and urban homes.

06

AS PRIVATE AS YOU WANT TO BE

With privacy as with so much else, shutters put you in charge. Different shutter designs offer different degrees of privacy, but nearly all let you obscure your eye-level living space without plunging the room into darkness.

Our promise to you

Customer satisfaction is our first priority and we've set out a clear service promise on how we deliver. Here's what you can expect when you work with ShuttersUp.

ONLY THE FINEST SHUTTERS

Our standards are as exacting as yours. Our shutters are manufactured and finished to the highest quality, protected as standard by our minimum 10-year warranty.

ONE TEAM, ONE ETHOS

All of our surveyors, fitters and customer support team are well-trained experts. Any team member you speak to has already met our mark.

NO HIDDEN COSTS

We will price up your job transparently, reliably and in full. In our 18+ years in business, we have never retracted a quote.

THE DIFFERENCE IN THE DETAIL

We pride ourselves on quality workmanship and believe we bring unrivalled knowledge, care and attention to every stage of the job, from consultation to installation and beyond.

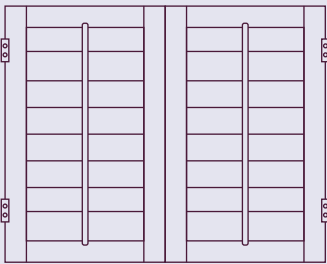

ALWAYS THE RIGHT SHUTTERS

We do what's best for you, not what's easiest for us. We will apply our extensive know-how to come up with the perfect shutter solution for your space, your style and your budget.

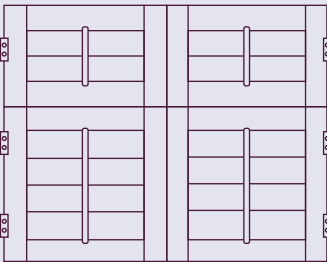

Our shutter designs

Different spaces call for different shutter designs. Each of ours has its own characteristics and benefits, offering distinct aesthetics while providing varying degrees of light and privacy.

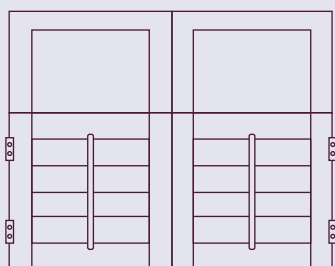

FULL HEIGHT

The clean, elegant lines of our most popular shutter designs dress windows and doors from top to bottom, offering a great look and total privacy.

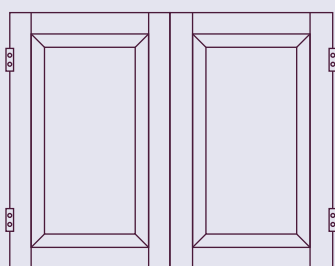

TIER ON TIER

Versatility is the word. The top and bottom tiers open independently, so you never have to choose between light and privacy.

CAFÉ

Covering only the lower half of your windows, Café style shutters keep your living space private but flood the room with natural light.

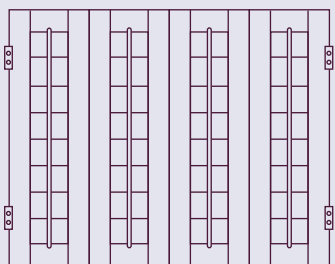

SOLID PANEL

A beautiful feature in any traditionally decorated room and a particular favourite for bedrooms, thanks to near-blackout when closed.

BESPOKE SHAPES

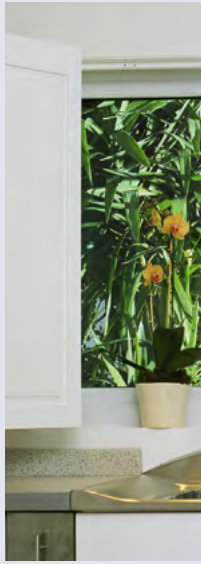

From circles to ovals to triangles to arches, we've made bespoke shutters for many a weird and wonderful window.

TRACK SYSTEMS

If you want shutters for patio doors, a walk-in wardrobe or as a room divider, our unobtrusive track system shutters will glide open and closed elegantly and quietly.

Our shutter ranges

We believe that every customer should receive beautiful, robust shutters that are made to last. Therefore, we have carefully selected materials so that you never have to compromise on longevity, no matter your requirements.

HARDWOOD

Manufactured with sustainably sourced wood, you can be assured that our hardwood shutter range will offer an unrivalled premium finish alongside durability to match.

PVC

Our PVC range is 100% waterproof and therefore ideal for bathrooms or any other wet area that is vulnerable to fluctuations in moisture.

Manufactured to the highest standards and built to last, our shutters come with a five year manufacturers warranty and lifetime maintenance warranty.

A close-up photograph of a person's hand, with visible skin texture, wiping a white horizontal shutter blade with a light-colored, textured cloth. The background shows other shutter blades, creating a sense of depth and detail.

It's all in the detail

Once you have chosen your shutter material and finish, we offer further bespoke options whilst ensuring that every shutter is finished to the highest of standards..

TILT ROD OPTIONS

From traditional tilt rods that can be centralised or offset, hidden rods that are attached at the back of the shutter, or a complete clearview option that is built into the shutter itself - we offer a range of different options so that you can select the tilt mechanism that suits your design preferences best.

LOUVRE SIZES

We offer a choice of louvre sizes for different purposes, effects and spaces. At your initial design consultation, you can work with an expert ShuttersUp design consultant to decide the best louvre size for your project.

FINISHING TOUCHES

Our shutters are finished to our impeccable standards. Every millimetre of every shutter is sprayed or stained no less than six times, then protected from direct sunlight by a special UV coating for a tough, lustrous, fade-resistant finish.

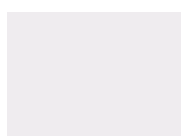

Our colour palette

Whatever your style and interiors plan, we have the colour scheme to suit. Our wide-ranging palette lets you choose from dozens of natural and neutral stains and paint colours.

CUSTOM COLOURS

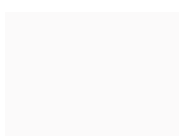

Want to get colourful with your shutters? No problem. We can finish them in virtually any colour you ask for, even colour-matching the palettes of the UK's top paint companies.
